## PROFESSIONAL EXPERIENCE

**MAVERICK SYSTEMS** | University Park, PA  
**Co-Owner/Lead Developer**

**April 2018 – Present**

Co-owner of a startup company based out of State College, PA. Lead developer and systems architect designing a server-based supply chain management system using an HTTPS server backend data system written in Java and a frontend web interface using HTML5/CSS, JavaScript, PHP, and Bootstrap

- Manage and lead a 5-person development team as well as handling company financials and internal systems
- Developed and implemented a Java-based HTTPS server backend data system to provide secure and light-weight access to our database
- Developed and implemented an efficient and secure MySQL/MariaDB database to manage a high volume of records and traffic.

**EAST PENN MANUFACTURING** | Lyon Station, PA  
**Inventory Control Technician**

**May 2018 – August 2018**

Ensured validity of internal inventory of second largest lead oxide battery manufacturer in the world. Extensive work with East Penn's internally-developed inventory management system and off-the-shelf manufacturing software Glovia

- Partnered with plant department supervisors and plant supervisors to adjust inventory amounts and locations to match actual stock and locate missing inventory.
- Generated effective reports from the inventory management system to facilitate inventory placement and efficiency.
- Partnered with purchasing department to verify purchase order receiving records and vendor invoicing
- Utilized mainframe-based inventory management system software via Citrix VM software

## EDUCATION

**THE PENNSYLVANIA STATE UNIVERSITY** | State College, PA
